VB Series

Heavy cutting double column machining center

w i d e n y o u r c u t t i n g v i s i o n

With Vision Wide tradition in making high rigid structure, VB series provides not only high accuracy but also heavy cutting ability.

VB series is designed for being the most proper devices in mold and precision machining industry.

- ▶ Rapid traverse: 15 m/ min
- ▶ Cutting feed rate: 7 m/ min
- ▶ High torque gear type spindle: 4,000/ 6,000 rpm
- ▶ Belt type spindle: 8,000/ 10,000rpm

X-axis travel: 2.0/ 2.5/ 3.1/ 4.1m

Y-axis travel: 1.6/ 2.0m

Z-axis travel: 800/ 1,020mm

Port width: 1,700/ 2,100mm

Box way for XYZ-axis

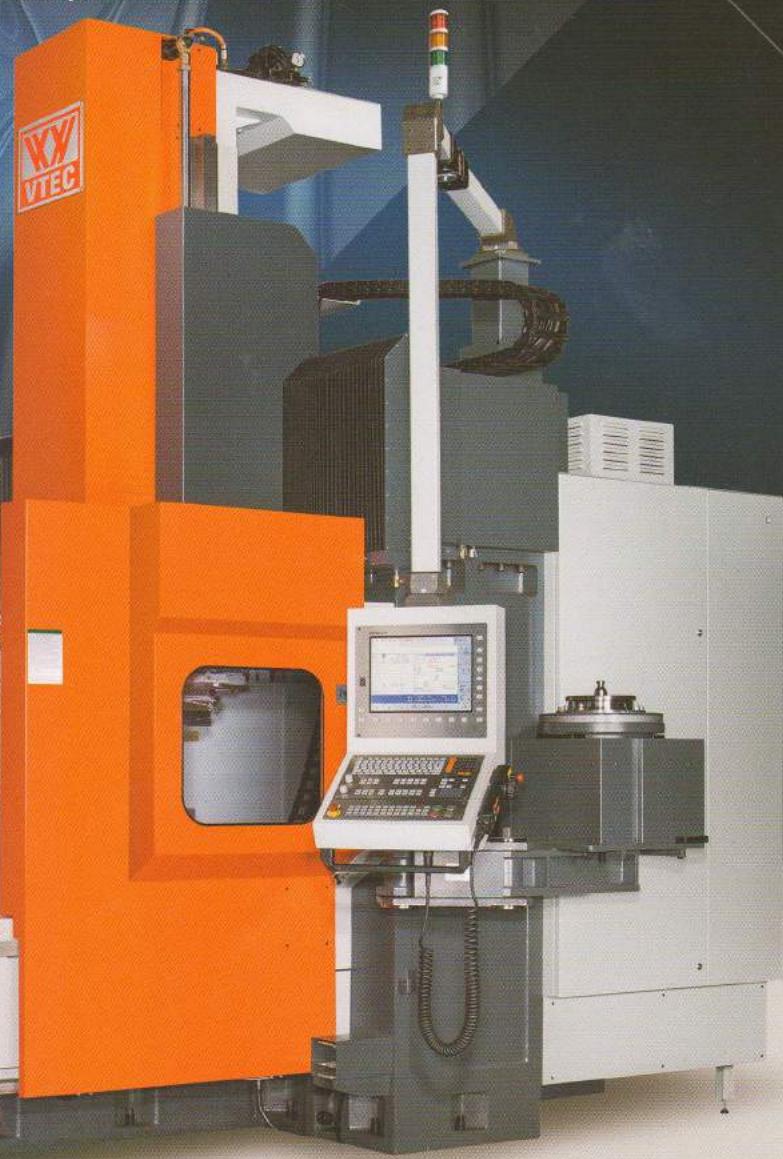

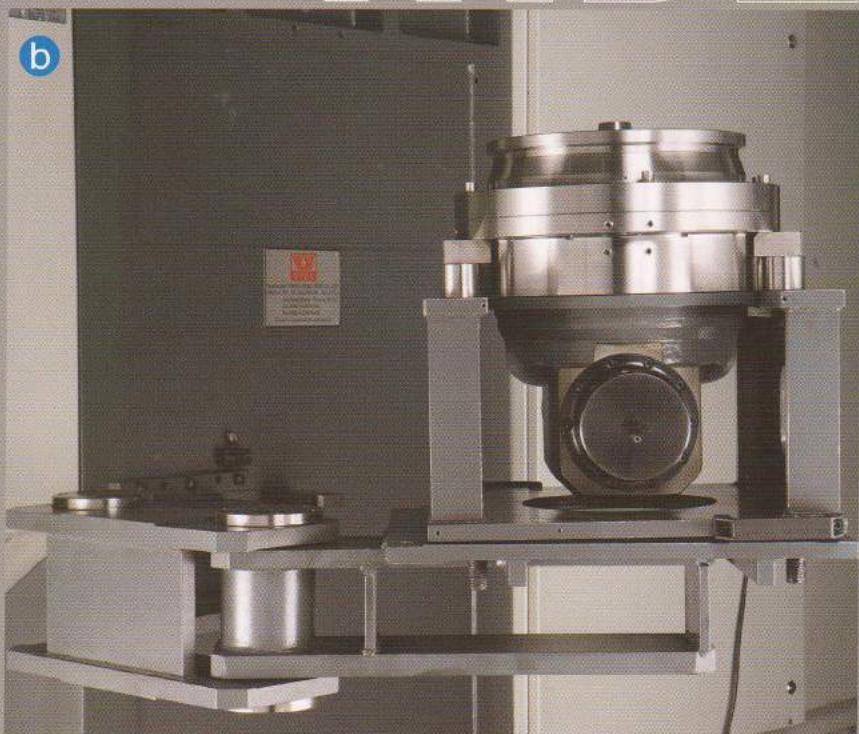

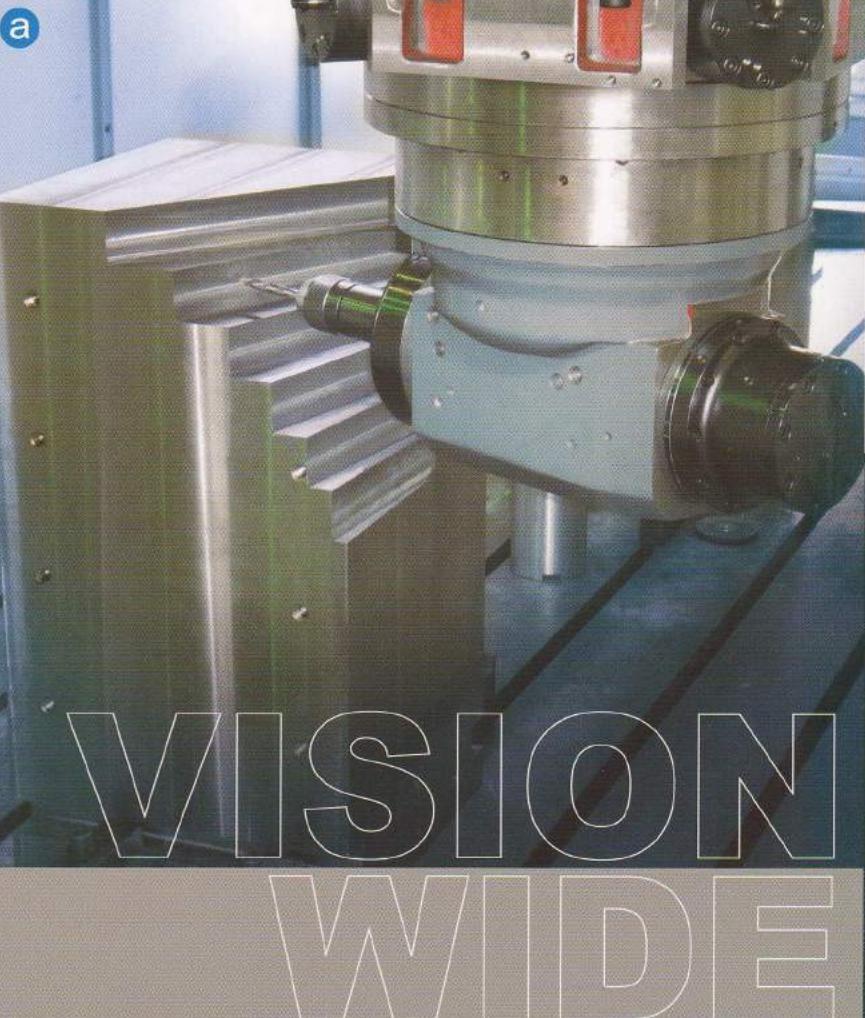

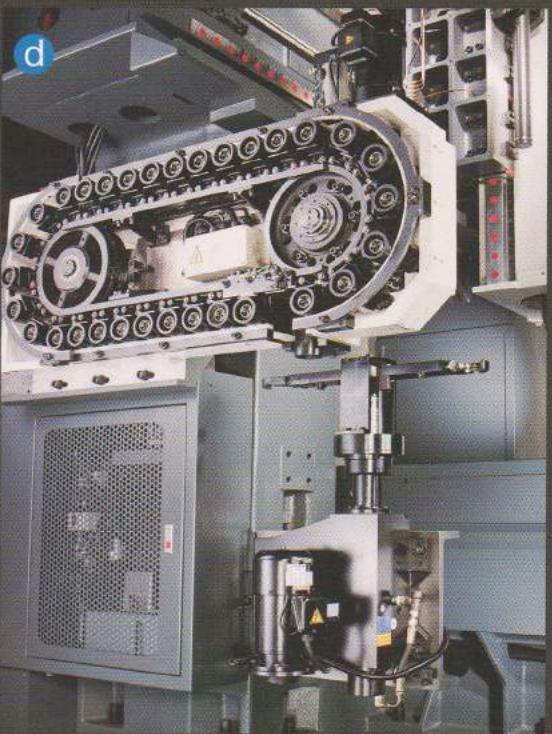

Photo: VB-2016 model with enclosed splash guard (without roof) and manual swiveling arm type head bracket

VB series VISION WIDE

Diversity machining module and function can be equipped with

- a Various types of heads
- b Manual swiveling arm type head bracket (on operation side)
- c Auto swiveling arm type head bracket (on operation side)
- d Arm type ATC

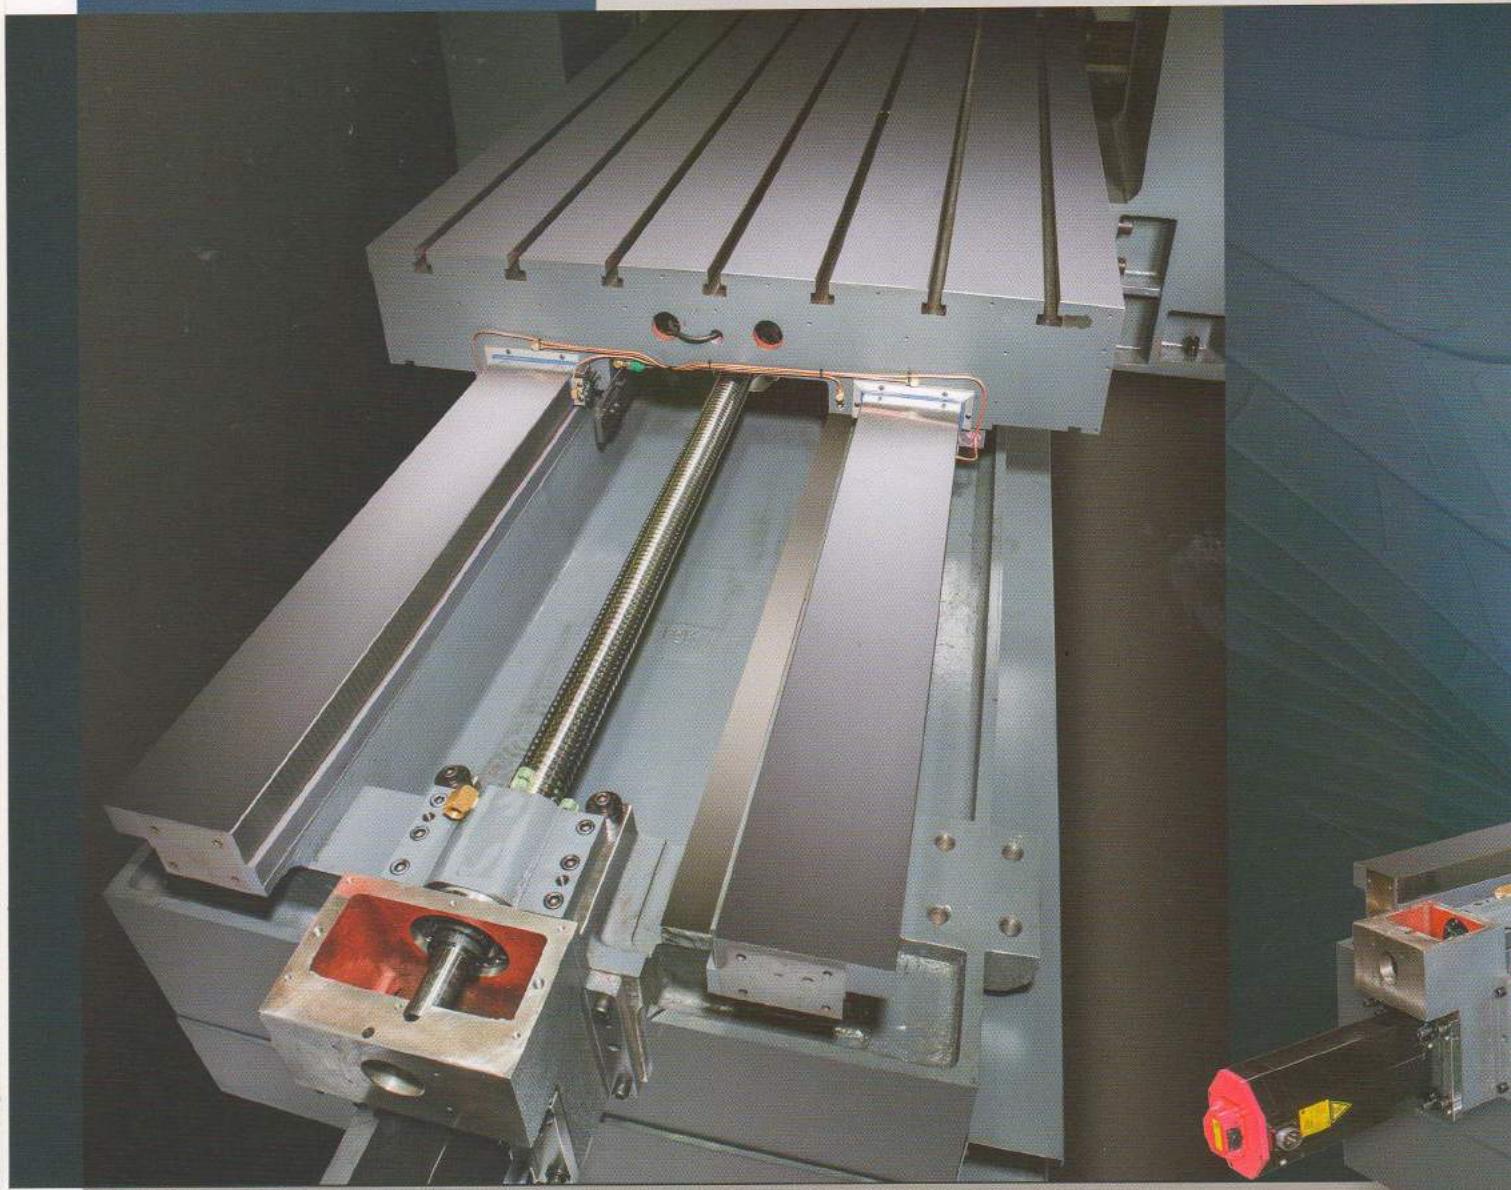

w i d e n y o u r c u t t i n g v i s i o n

VB series
VISION WIDE

High rigid
structure design

X-axis feeding system is fully supported by box guide w

High rigid box way

2-way support design on the bed with optimal span des

With Vision Wide tradition,
the optimized structure design offers heavy
cutting rigidity in heavy cutting.

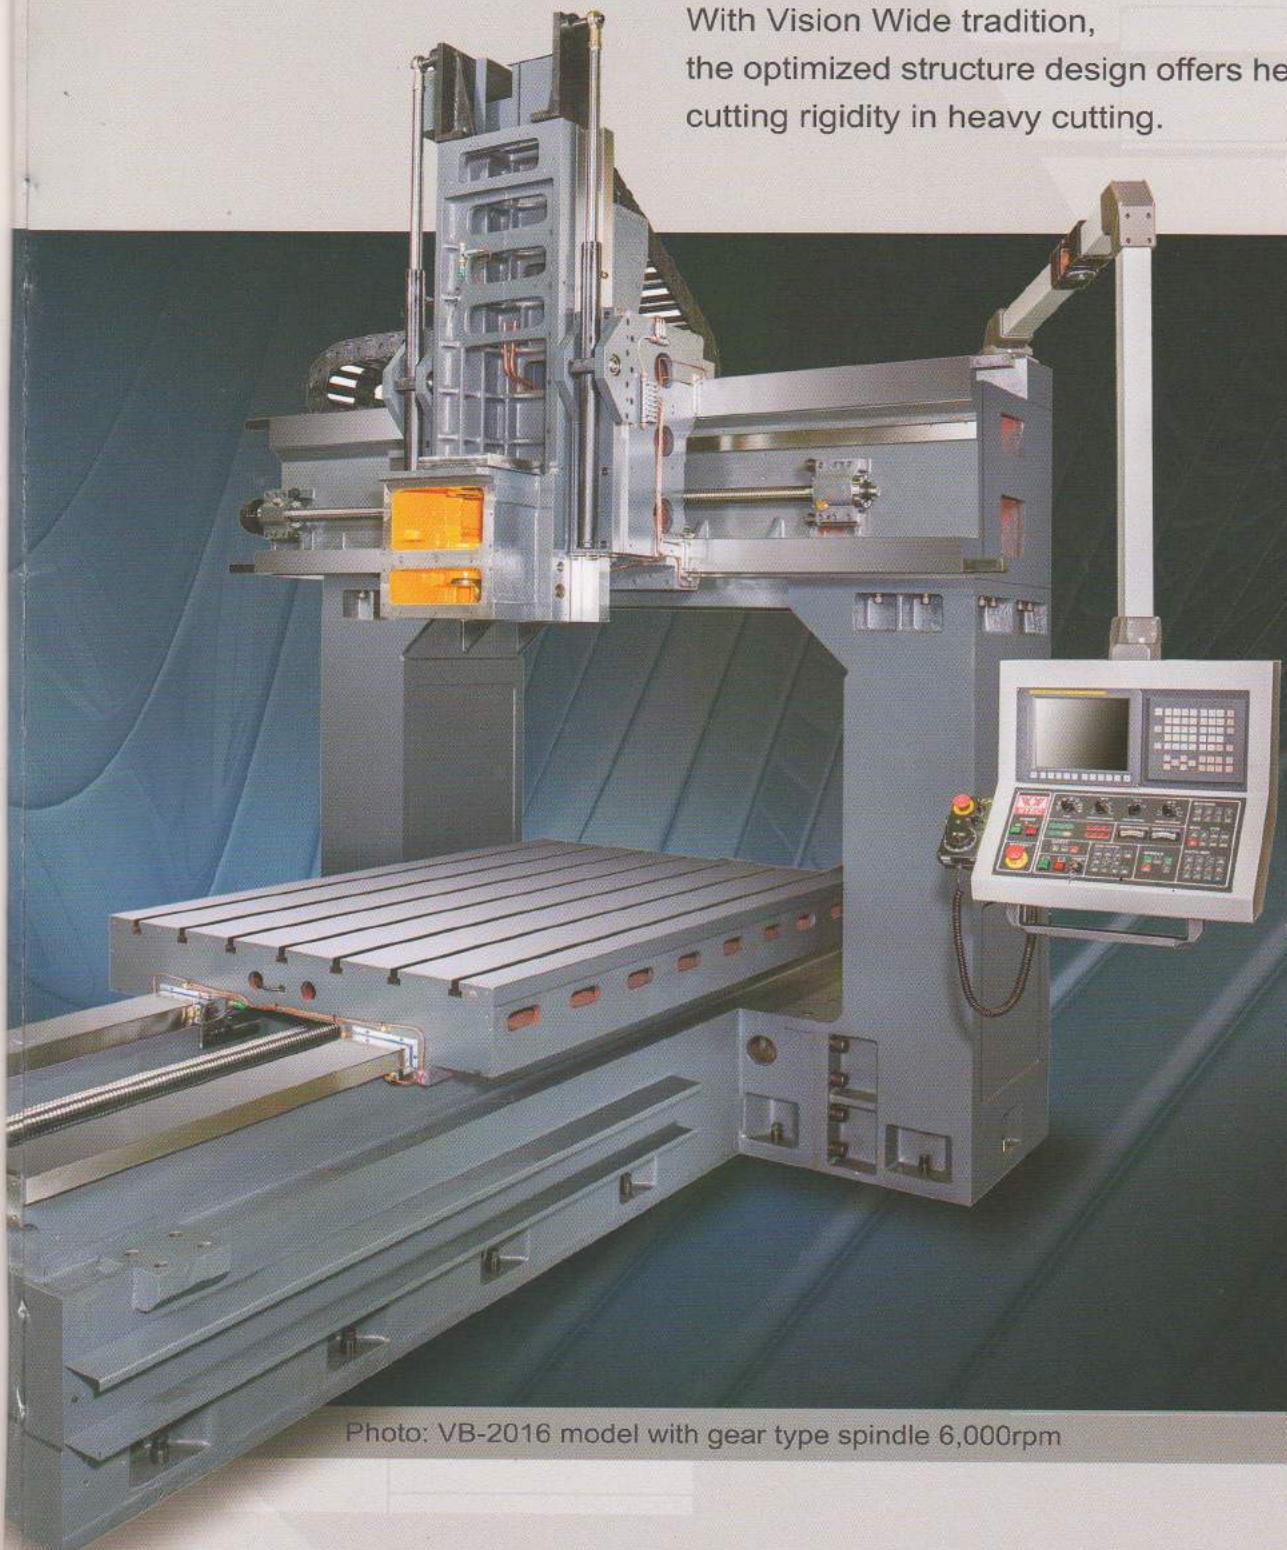

Photo: VB-2016 model with gear type spindle 6,000rpm

Improving high rigidity and reliability

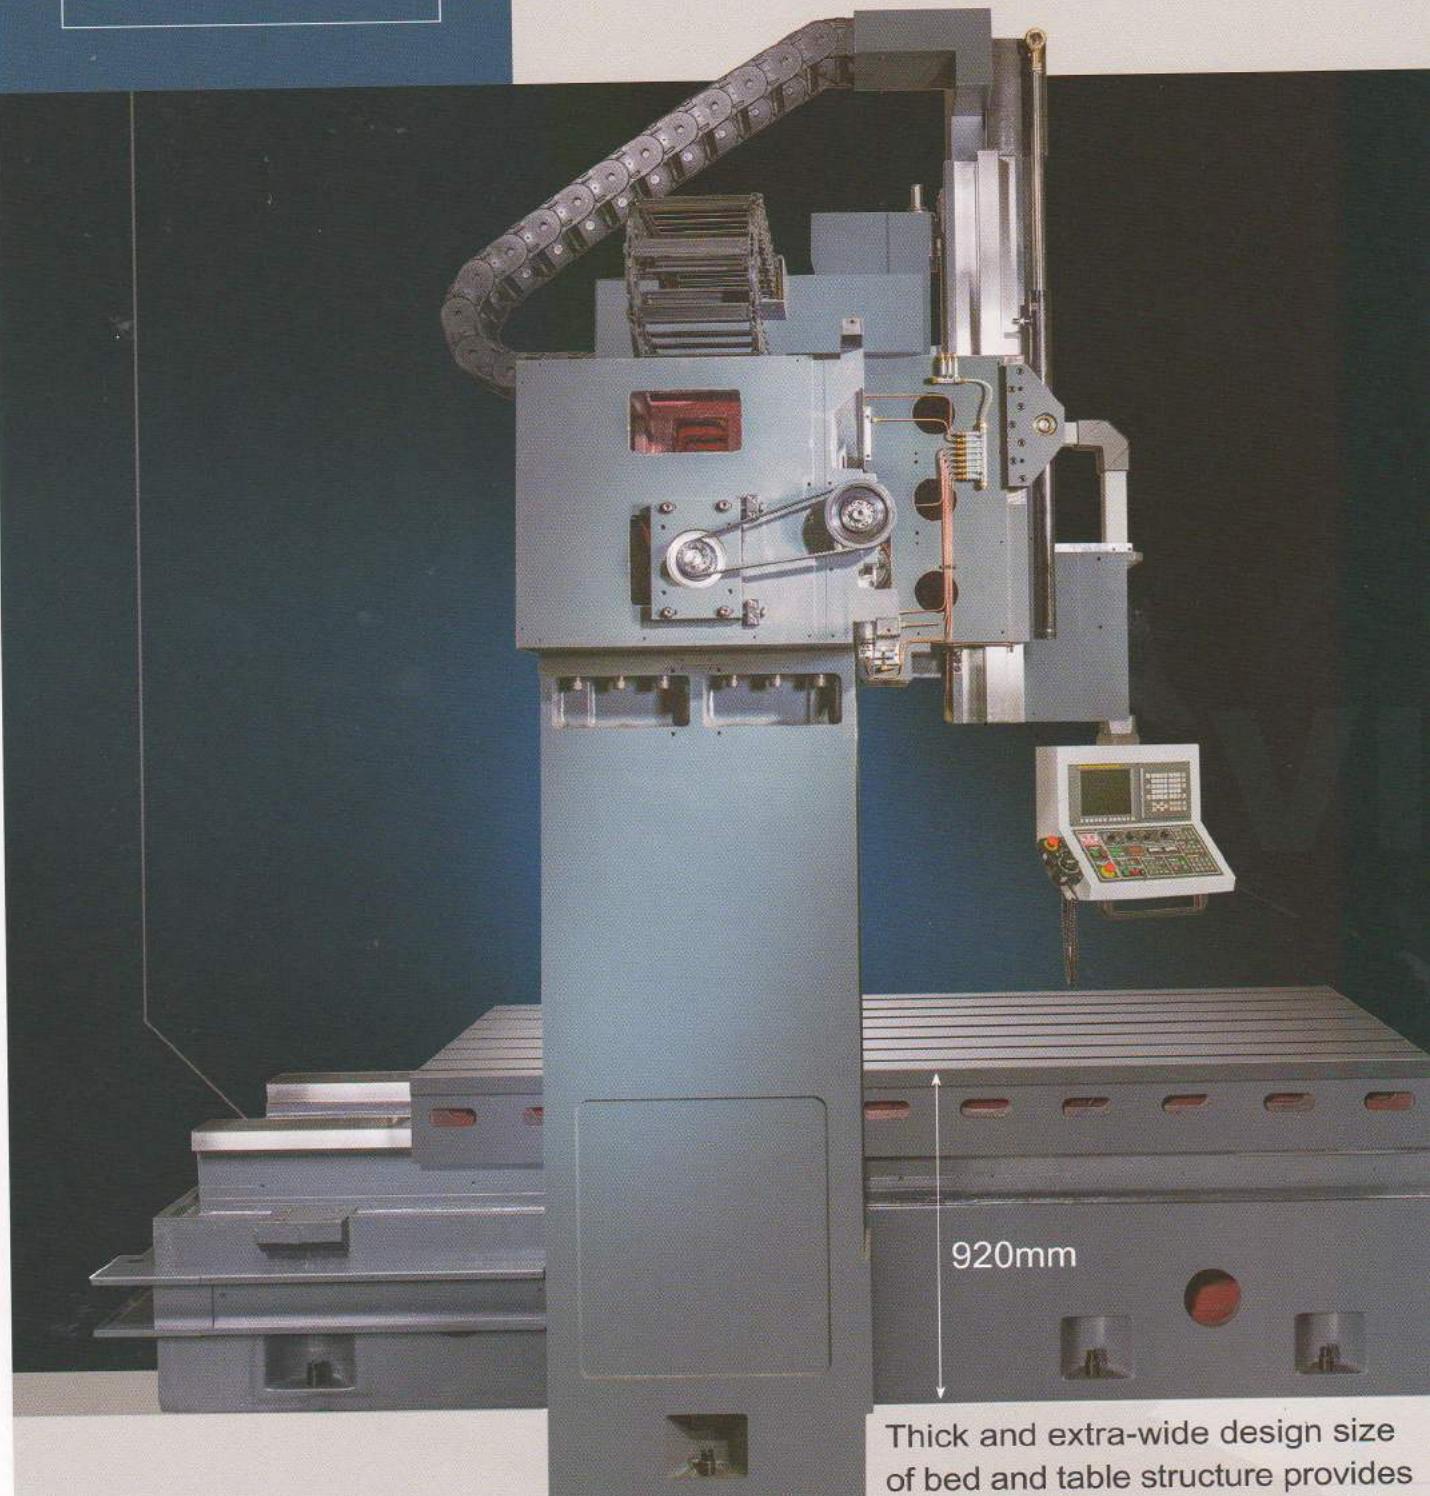

Enhancing the loading capability, and keeping high dynamic level accuracy

Ensuring straightness within 0.01mm/2m at X-axis motion

►VB series
VISION WIDE

Large size column provides the beam the strongest support

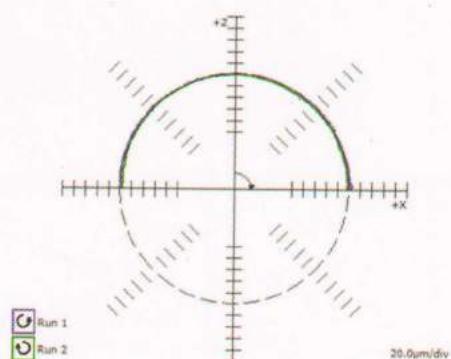

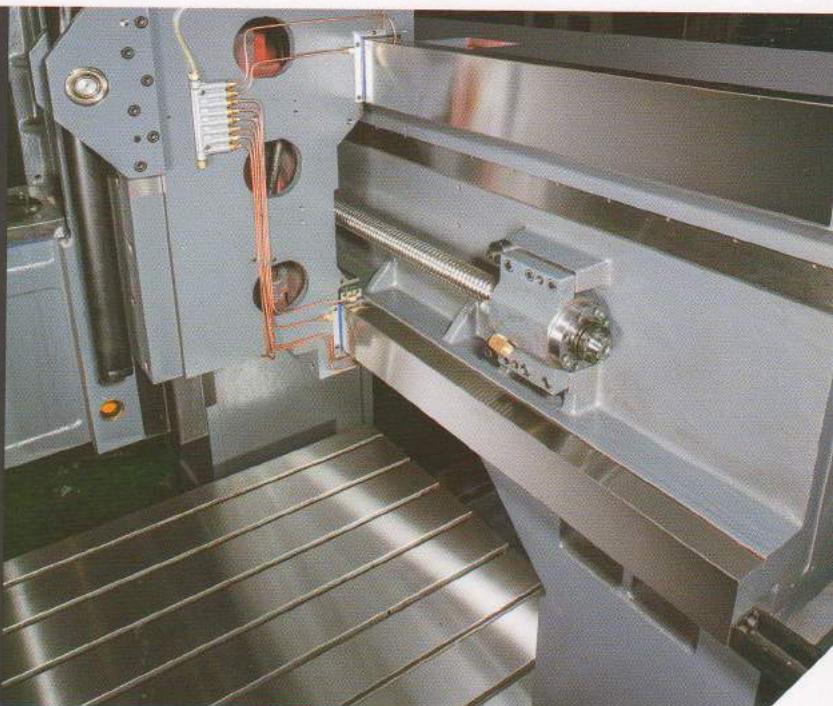

Thick and extra-wide design size of bed and table structure provides optimal straightness of workpiece movement.

►VB series VISION WIDE

Large special span in Y-axis for rigidity, with stepped design reduces movement friction, and improve positioning accuracy.

High precision mechanism features

Z-axis 15m/ min rapid traverse, 0.5G high acceleration/ deceleration performance achieve the requirements from contour accuracy of high speed mold machining.

High speed balancing system including economical twin hydraulic cylinders with pressured air assistance achieves:

- Smoother Z-axis movement
- Z-axis retract function at power failure
- Excellent performance for power saving

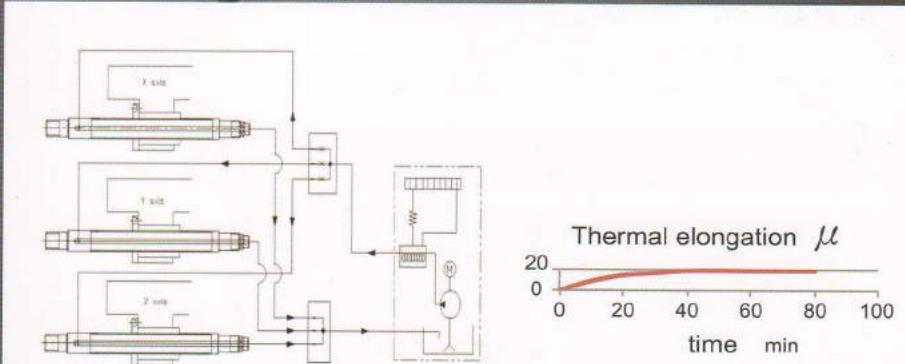

One-piece casting design in Z-axis and spindle gear box for symmetrical heat conduction and high rigidity ensuring.

2-step gear type spindle with 4 sets high rigidity ball type bearing configuration, bearing dimension 100x50mm provides high rigidity, and also increases working lifetime.

- 3-axis ball screw cooling system
The hollow ball screw with oil cooling system efficiently reduces thermal deformation at machine operation.
- Spindle and 3-axis ball screw cooling system ensure optimal heat balance control.

Independent spindle and 3-axis ball screw cooling system:

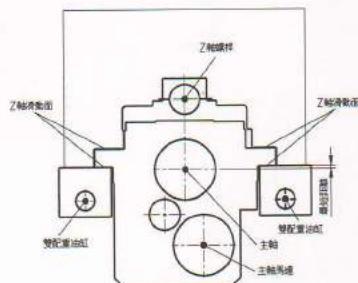

1. To force spindle bearing and gear cooling, effectively restrain spindle thermal deformation
2. Effectively control ball screw temperature within +/- 2 degree to ensure ball screw thermal deformation

VB series VISION WIDE

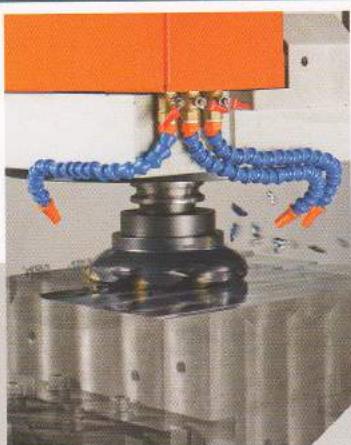

Optimal central symmetric spindle system design offers high cutting performance

- ▶ Minimum distance between spindle center and Z-axis roller way not only shortens cutting lever arm but also significantly improves cutting rigidity.
- ▶ Symmetric spindle gravity configuration, Z-axis ball screw, spindle center and spindle motor configure at gravity point of Z-axis box structure centerline provide the best feed precision and thermal balance.
- ▶ Gear spindles made of Japan-made JIS-0 grade precision gears are with high precision, low noise and high efficiency transmission performance.
- ▶ 2-step gear type spindle provides high torque and high speed characteristics to ensure heavy cutting ability on surface finish of high speed cutting.

2-step gear type 4,000/ 6,000,
belt-driven 8,000/10,000rpm spindle speed
can be chose according different kinds of machining.

Heavy cutting ability test specification 22/ 26kW 4,000rpm spindle

Face milling:

Tool dia.:125mm

Removal rate:750cc/min

Mold cutting:

Tool dia.:25mm

Feed rate:5000mm/min

Gun drilling:

Tool dia.:32mm

Feed rate:550mm/min

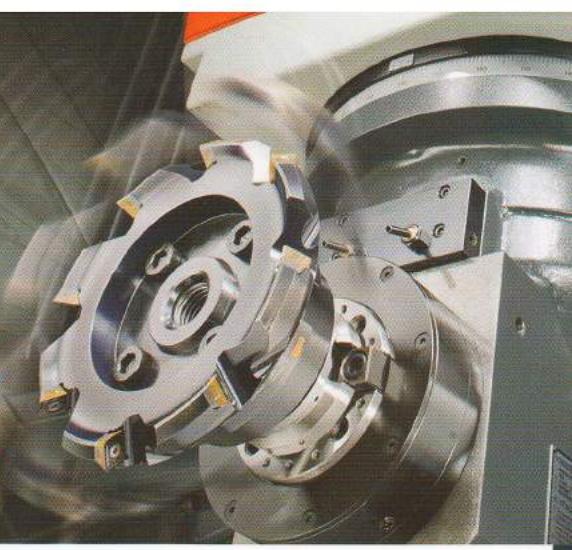

High torque gear type spindle
Industry-leading output torque,
15% more than competitors,
providing excellent heavy
cutting performance

Spindle speed 4000rpm, max. torque 890Nm (18.5/22kW),

1052Nm (22/26kW), 1952Nm (30/37kW)

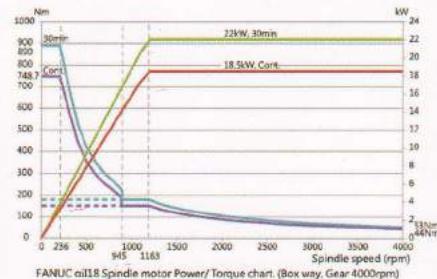

Spindle speed 6000rpm, max. torque 691Nm (18.5/22kW),

817Nm (22/26kW), 1517Nm (30/37kW)

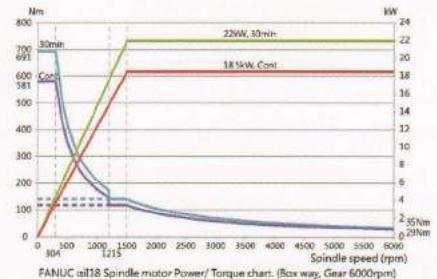

Spindle power and torque chart

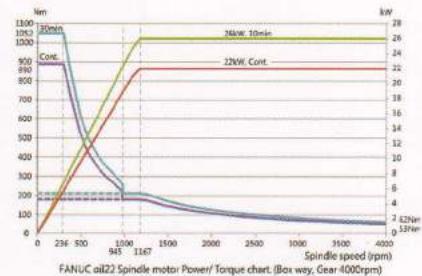

Fanuc α 18 18.5/22kW gear type 4,000rpm

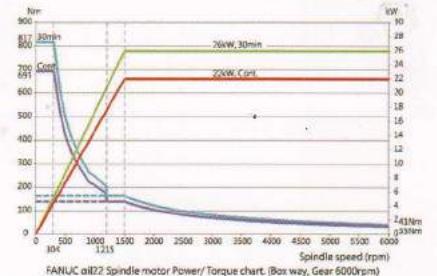

Fanuc α 18 18.5/22kW gear type 6,000rpm

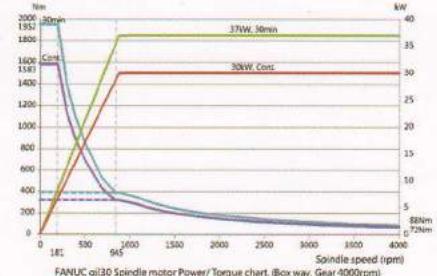

Fanuc α 22 22/26kW gear type 4000rpm

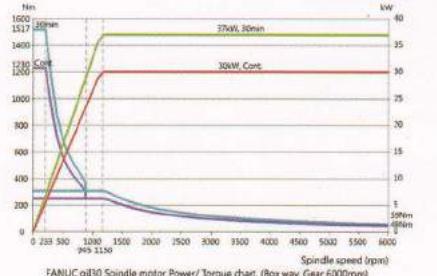

Fanuc α 22 22/26kW gear type 6,000rpm

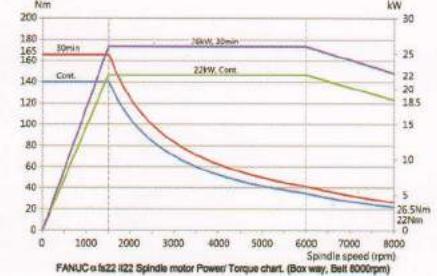

Fanuc α 30 30/37kW gear type 4000rpm

Fanuc α 30 30/37kW gear type 6,000rpm

Fanuc α 22 22/26kW belt type 8,000rpm

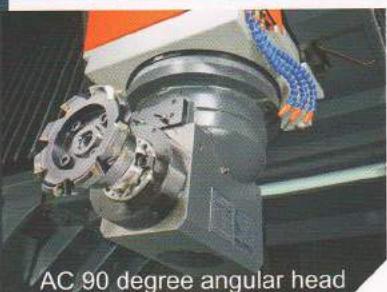

Fanuc α 22 22/26kW belt type 10,000rpm

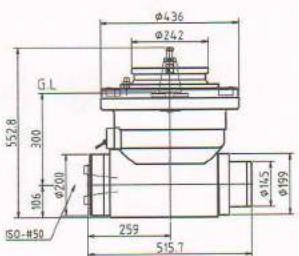

VB series VISION WIDE

Auto multi-angle head attachment

- ▶ B/C-axis auto 5° indexing
- ▶ C-axis auto 1° indexing
- ▶ Large diameter indexing mechanism
- ▶ Auto tool clamping device
- ▶ Flood coolant function
- ▶ AC 90° angular head with coolant through spindle

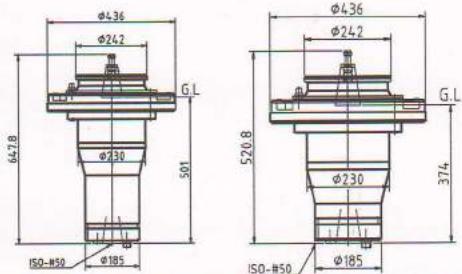

AC 90 degree angular head

Tool clamping	Auto hydraulic clamping
Head clamping	Auto hydraulic clamping
C-axis indexing	Auto 1° / 5°
Machining coolant	External nozzle/ coolant through spindle(opt.)
Max. power	26 kW
Max. speed	3,000 rpm

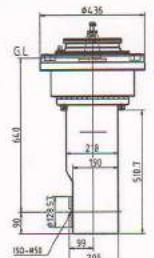

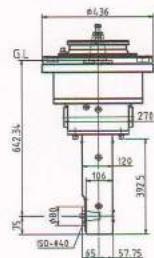

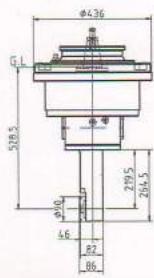

AC extended head

Tool clamping	Auto hydraulic clamping
Head clamping	Auto hydraulic clamping
Max. power	26kW
Max. speed	4,000rpm

through spindle

Various types of milling head

Tool clamping	Manual
Head clamping	Auto hydraulic clamping
C-axis indexing	Auto 1° / 5°
Max.power	26 kW
Max. speed	800 rpm

Can be opted with manual head attachments

▶ Manual 90 degree angular head
Max. power: 11 kW
Max. speed: 2000 rpm

▶ Manual universal head
Max. power: 15 kW
Max. speed: 1200 rpm

▶ Manual extended head
Max. power: 15kW
Max. speed: 2000 rpm

Intelligent multi-faced machining

(For AC head attachments)

Tool center point management (TCPM)

Each type of head attachment with tool center point management, takes vertical workpiece as origin benchmark, and converts the workpiece coordinates to any new specified plane of workpiece coordinates automatically.

Head attachment dimensions correction

Intelligent compensation on each type of head attachments, rotation center, tool size, workpiece coordinates system correction management, and greatly simplifies the complexity of programming and operation to achieve perfect auto multi-angle machining.

FX500 5-face machining function

- V/H tool diameter correction
- V/H spindle origin correction
- V/H working coordinate affine transformation
- V/H 3D rigid tapping
- V/H manual interrupting

Auto coordinates tool axis 3D conversion

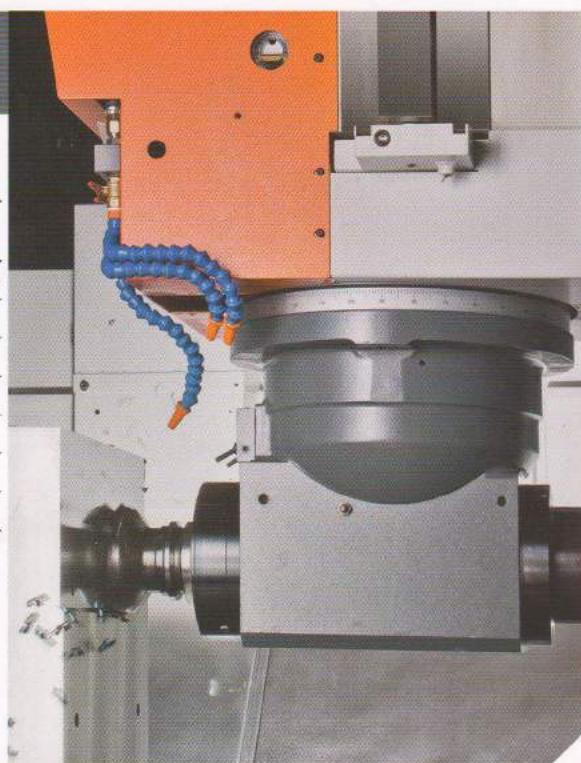

3-axis mechanical coordinates system can be automatically converted to machining coordinates system, easily achieving face milling, end milling, drilling and rigid tapping machining operations.

Heavy cutting ability

test specification: 22/26kW 4,000rpm spindle

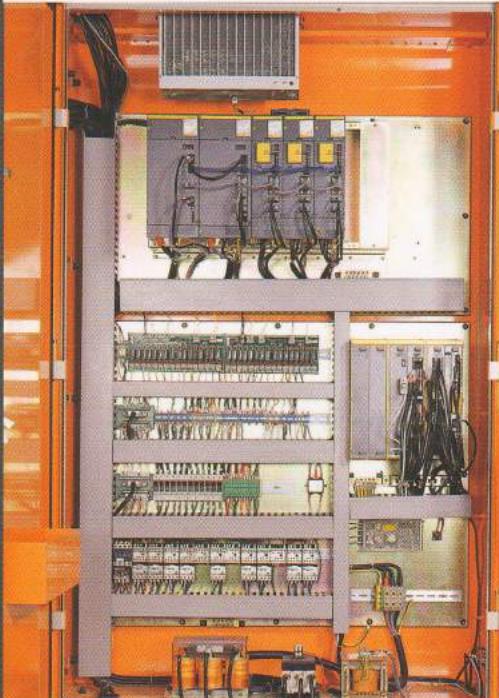

Through cutting depth test to show excellent heavy cutting rigidity

Head attachment	Extended head	90 degree angular head	2-axis head
Tool type	BT-50 face milling tool-diameter $\varnothing 125/5$ edge		
Cutting material	S45C		
Spindle speed(rpm)	600		
Machining width(mm)	100		
Feed rate(mm/min)	1000		
Machining depth	5	7	6
Removal rate(cc/min)	500	700	600

►VB series VISION WIDE

Safe, friendly and reliable operation interface

- Safe and reliable electrical circuit design
- CE compliant safety circuit design
- CE compliant EU regulation electrical parts for whole machine
- Auto locking operation door protection switch
- Z-axis retract function at power failure
- Anti-interference design on motor power cables
- Overload and phase protecting device on servo motors
- 3-axis over travel and hard limit protection
- Heat exchanger for electrical cabinet
- Main power protecting device
- EU regulation softkey operation panel
- Ethernet and RS232 interface
- USB port

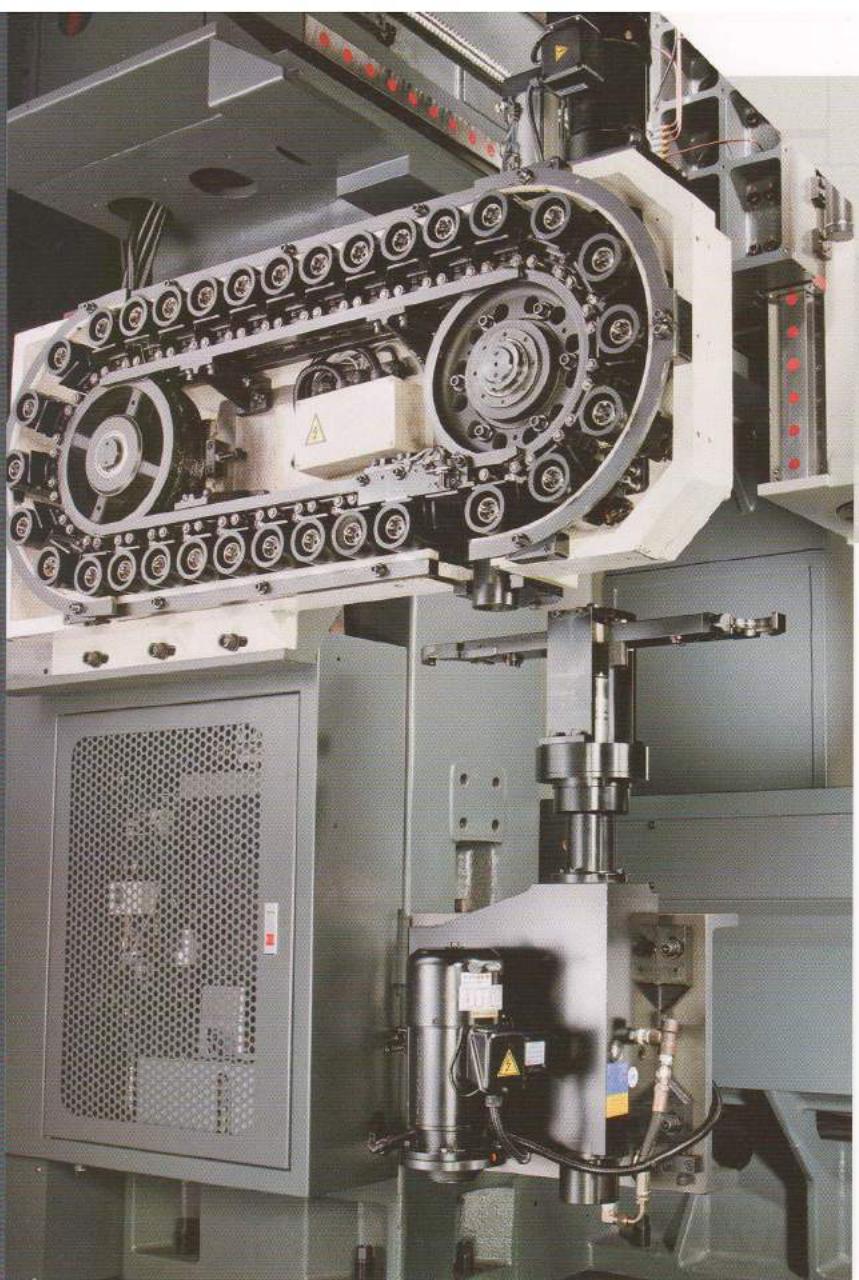

Sectional type design of sliding door type at operator's side extends the space for workpiece loading. Open-outward doors at both ends of the machine offer safety and large door open space.

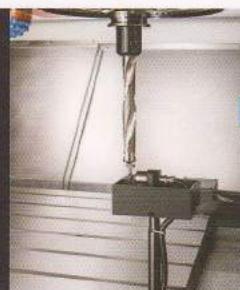

► Overhead pendulum type operation panel for users offers an easy-measuring, easy-programming, and safe working environment.

VISION WIDE

Side-mount tool magazine to save floor space,
32 tools magazine
(40 tools magazine(opt.))
Random tool change and special tool management offer easy cutting operation.

► Auto tool exchange,
tool to tool 5 sec.

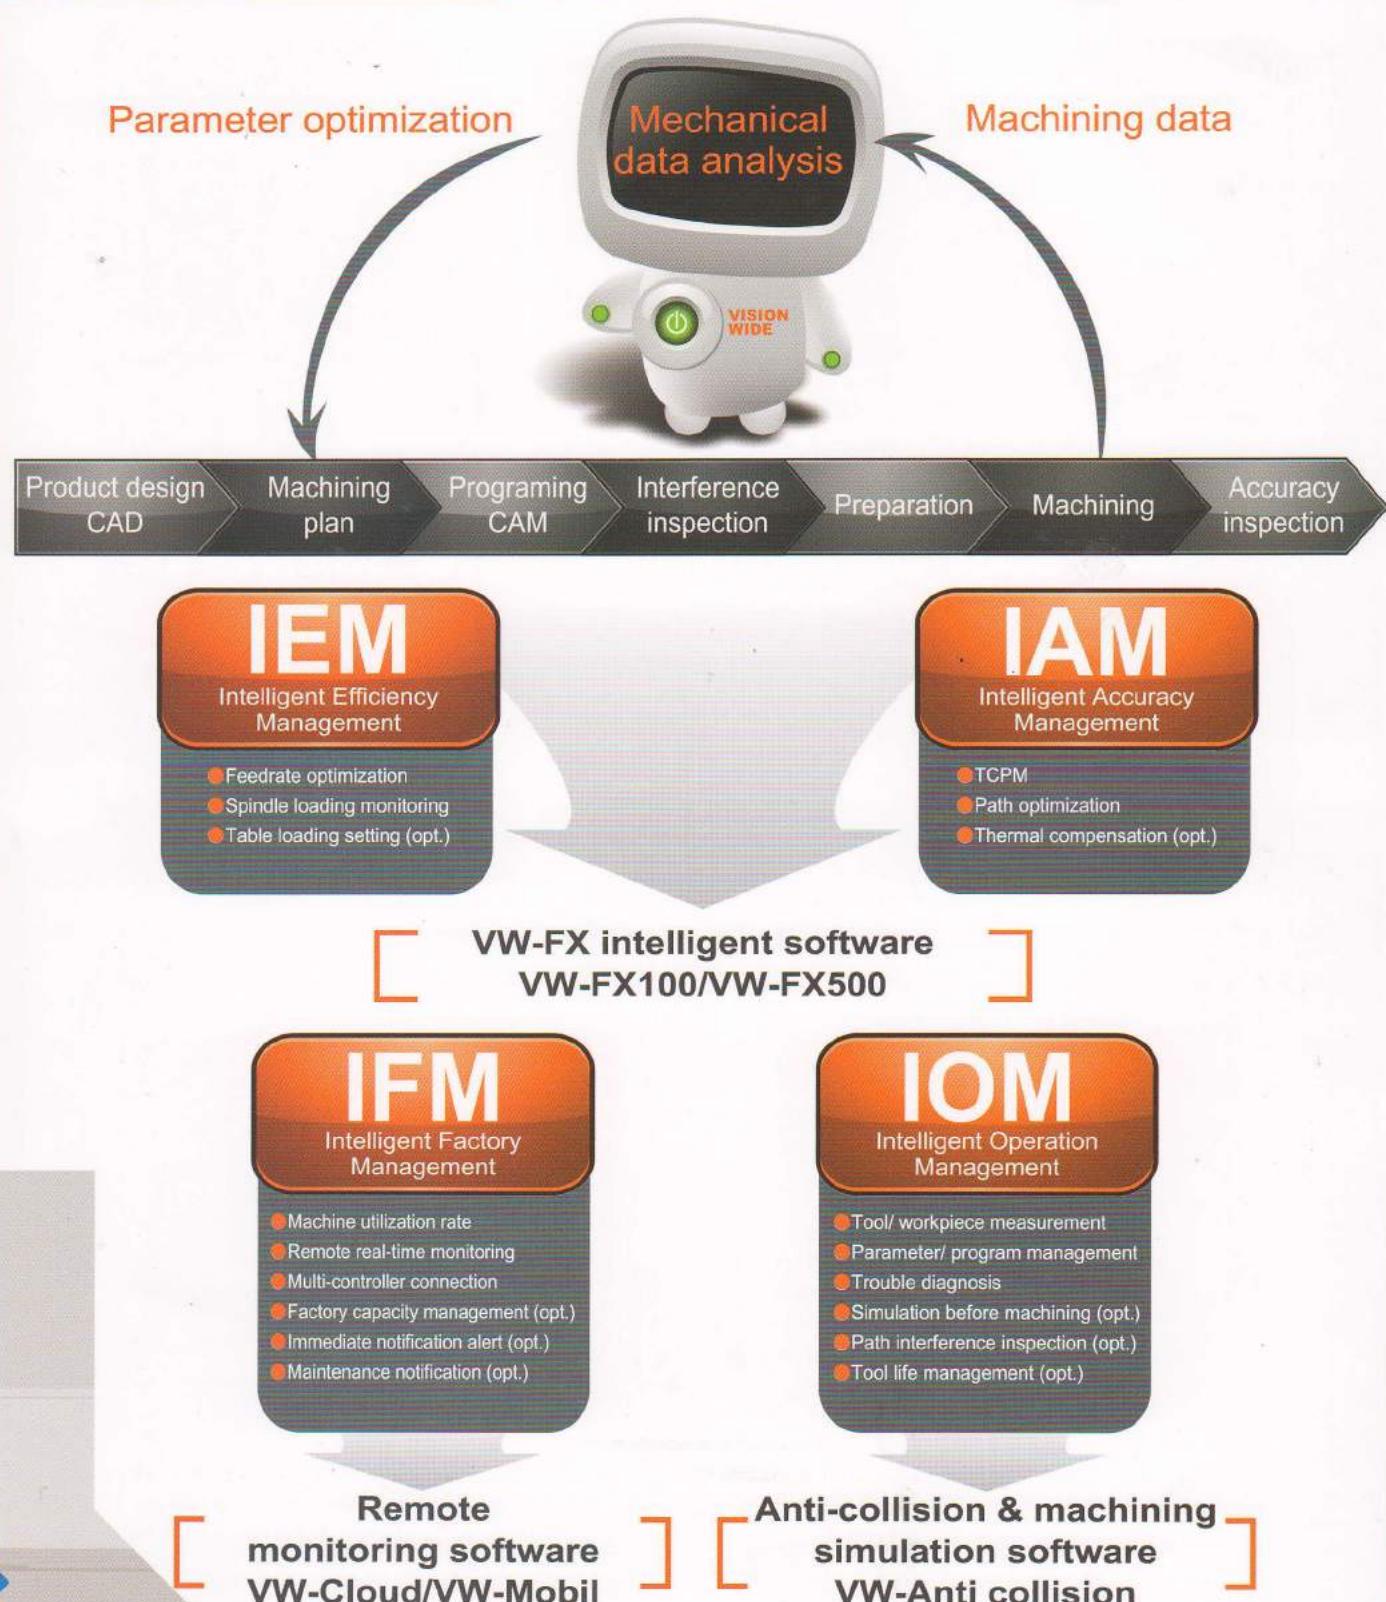

► Fast tool length measurement device for mold cutting.

► Spindle annular coolant jet efficiently reduces chips and heat in machining.
(opt. for no head attachment)

VB series VISION WIDE

Intelligent Application

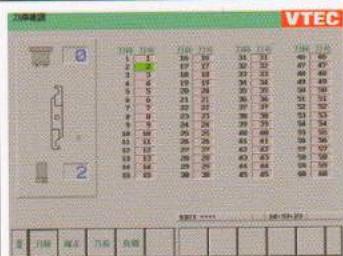

VW-FX

Intelligent Software

VW-FX for Fanuc controller

Tool List

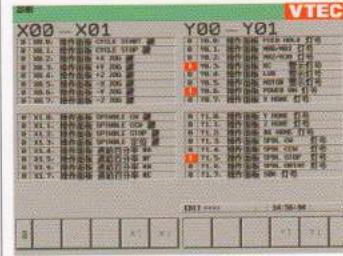

- Tool table data
- Tools status refer to ATC

Tool Compensation

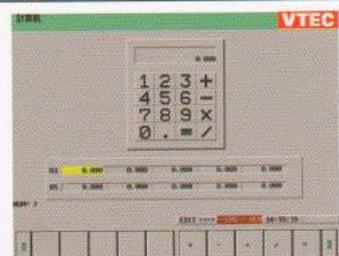

- Tool compensation data
- Tool position
- Utilization rate information

Machine Status

- Fast mappings of I/O and program comment

Calculator

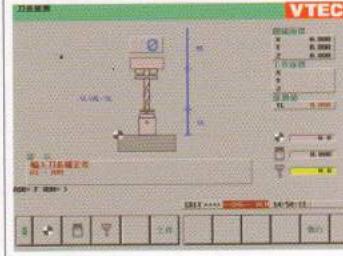

- +, -, ×, ÷ arithmetic operations
- Sine, cosine and tangent function
- 10 sets memory function

Workpiece Measurement

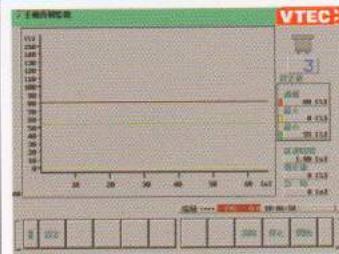

- Rectangle center measurement
- Rectangle corner center & angle measurement between workpiece
- Circle center/ circle radius measurement
- Angle corner center measurement

Manual Tool Length Measurement

- Fast Z-axis workpiece coordinate/ tool length measurement

Tool Load Manager

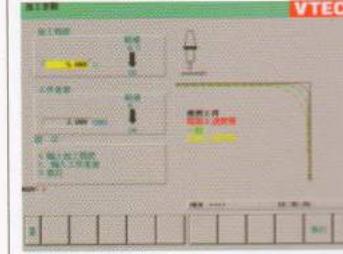

- 1 min. spindle loading status can be recorded
- Each tool spindle loading value can be set
- Machine stops when spindle overloading

AFO Feedrate Optimization

- Max. & min. spindle cutting overloading setting for each tool
- Auto acceleration when spindle lower than the min. overloading value

APO Auto Parameter Optimization

- Optimal parameters can be obtained through entering machine accuracy and workpiece weight
- Parameters backup and restore function
- Linear, angular acceleration/ deceleration function, effectively improve angular error

VB series VISION WIDE

Factory production line

Intelligent Application /
Remote monitoring software

VW-Cloud/ VW-Mobil

not available for Siemens controller

Cloud (opt.)

Production schedule

Machine Status

- +, -, ×, ÷ arithmetic operations
- Machine coordinate/ absolute coordinate/ incremental coordinate
- Running program showing
- G/S/T/M code status
- Spindle speed/ axial feedrate
- Machine boot time
- Machine total machining time
- Single program machining time

Program Transfer

- Program network transfer function (upload/ download)
- PC ↔ Data Server
- PC ↔ NC Memory

Alarm Record

- Controller Alarm Record
- Operation record

Compensation Data Transfer

- Tool compensation value
- Workpiece coordinate
- Macro variable
- edit function (opt.)

Server and Spindle Loading Record (opt.)

- Record spindle and server overloading status

Maintenance time auto notification (opt.)

- Maintenance items/ time can be set
- Alarm notification when overtime

Tool Management (opt.)

- Tool data and lifetime setting
- Alarm notification when overtime

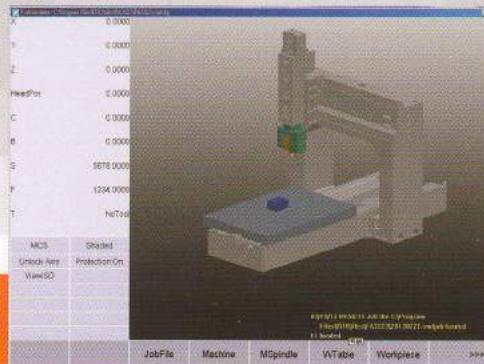

APP VW-Mobile

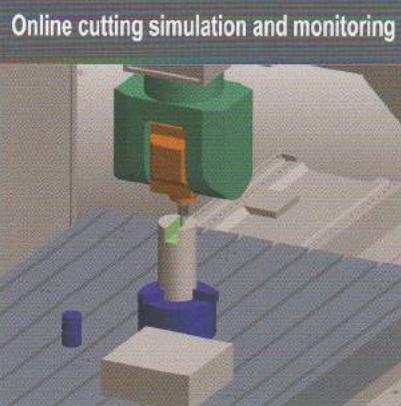

- Machine status
- Program transfer
- Production status
- Alarm signal
- Compensation data transfer

Intelligent Application /
Anti-collision and machining simulation software
VW-Anti collision (opt.)

not available for Mitsubishi controller

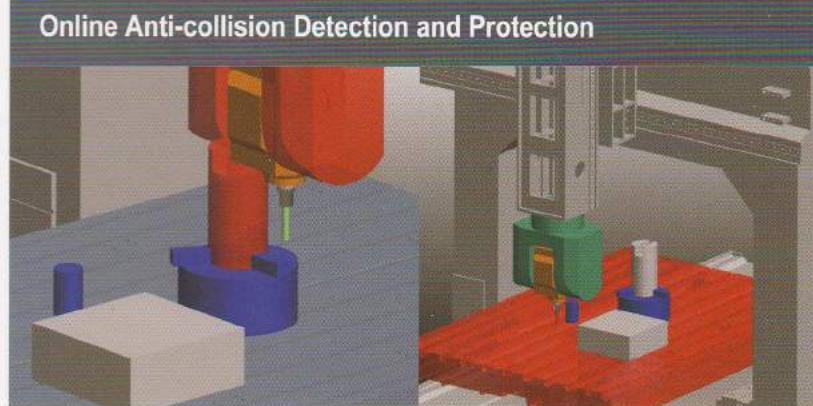

Safety | Efficiency

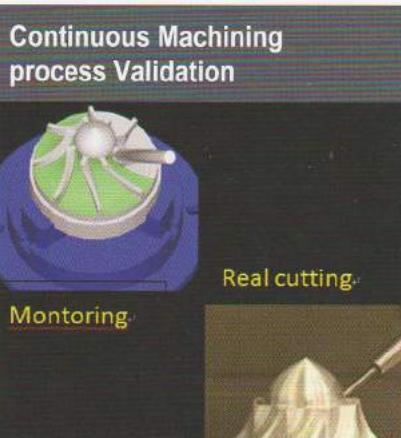

Online cutting simulation and monitoring

- Sync 3D cutting simulation
- Material removal operation
- Wide angle monitoring and surveillance

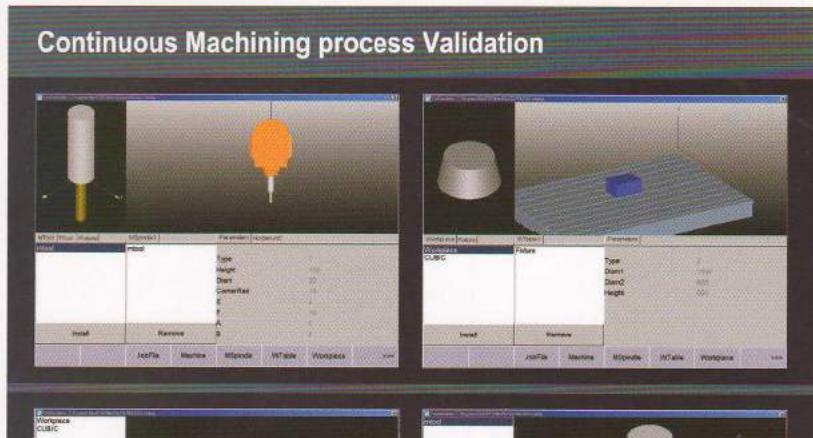

Online Anti-collision Detection and Protection

- Tool, tool shank, workpiece, fixture anti-collision detection
- Hand wheel/ manual/ auto mode anti-collision protection
- Dynamic anti-collision protection zone

Continuous Machining process Validation

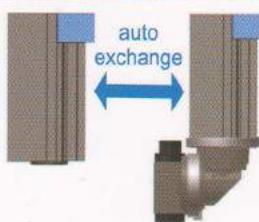

- Machining program simulation (online dry run)
- End product and semi-product import and access

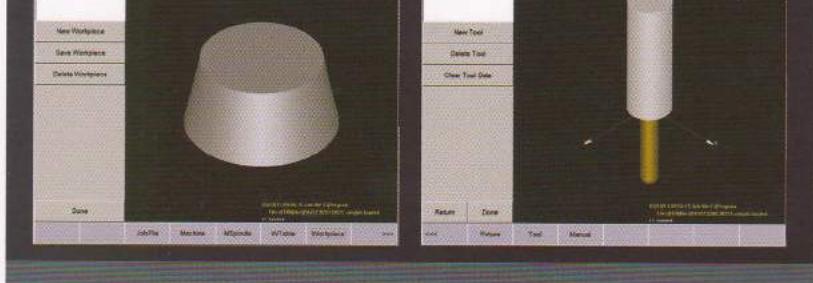

Continuous Machining process Validation

- Machining program simulation (online dry run)
- End product and semi-product import and access

Head Attachment Auto Exchange

- Machine head attachment graphic auto switch

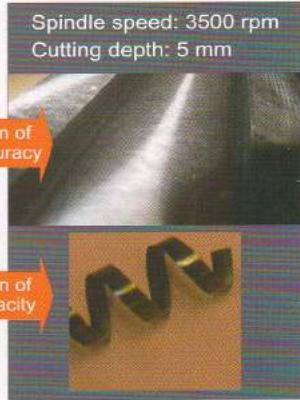

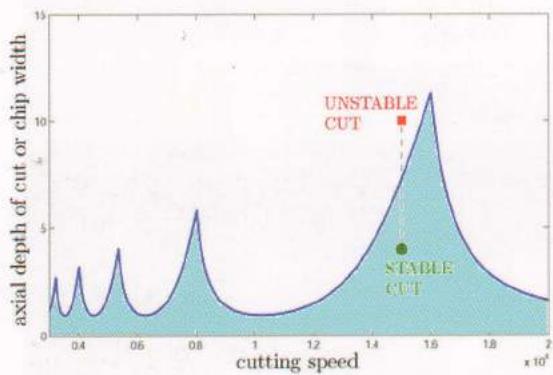

- Easy and Fast Process
- Built-in machine data
- Complete tool, billet, fixtures geometry editing and installation setting
- Controller origin data synchronization

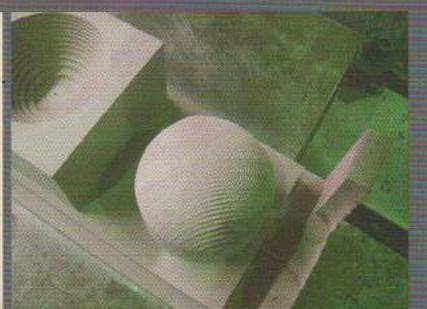

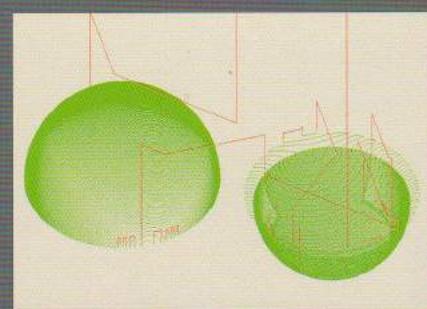

►VB series VISION WIDE

Optimal cutting application from the analyzation of the combination between CAD/CAM and LOBE analysis

- To provide best cutting conditions and recommendations on combination between tool and machine

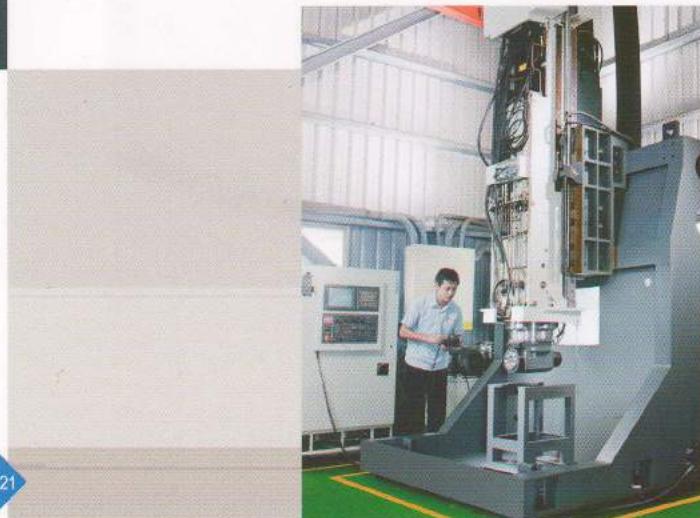

- Providing estimate cutting time

Modularized Production-After components assembled and tested.

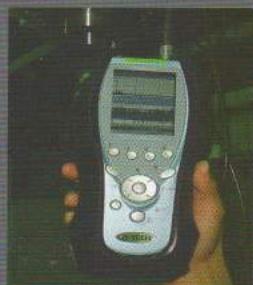

- After assembling & testing, these parts will be assembled in the main production line

Strict production processes and quality management system
Complete quality check procedures to create high machine quality

Standard Accessory

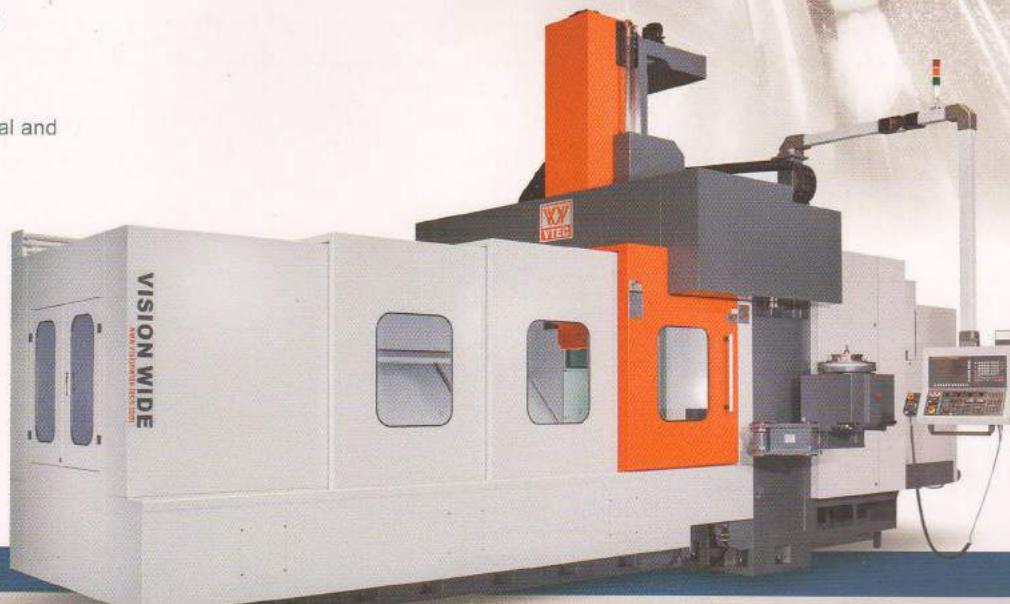

- 1 FANUC 0iMD controller
- 2 4,000rpm 2-step geartype spindle
- 3 Spindle oil cooler
- 4 Twin hydraulic cylinders with pressured air assistance balacing system
- 5 X-axis ball screw supporter (4m)
- 6 Centralized auto lubrication system
- 7 Independent lubrication oil collector
- 8 Ball screw cooling system
- 9 Air blast through spindle
- 10 Wash gun and pneumatic interface
- 11 Cutting fluid cooling system
- 12 Spindle ring cutting coolant device
(for no head attachment)
- 13 32 tools magazine with arm type ATC
- 14 Enclosed splash guard (without roof)
- 15 Swiveling arm type operation panel
- 16 Screw type chip conveyor on table side
- 17 Caterpillar type chip conveyor
- 18 Heat exchanger for electrical cabinet
- 19 Working lamp
- 20 Operation cycle finish and alarm light
- 21 Movable manual pulse generator(MPG)
- 22 Footswitch for tool clamping
- 23 RS232 and RJ45 interface
- 24 XYZ-axis absolute pulse coder feedback
- 25 XYZ-axis travel hard limits protection
- 26 Auto power off
- 27 Vision Wide FX graphical user interface
(Fanuc only)
- 28 Foundation pads and bolts kits
- 29 Adjustment tool and tool kits
- 30 Technical manuals
(operation, maintenance manual and
circuit diagram)

Optional Accessory & Function

- 1 6,000rpm 2-step gear type spindle
- 2 8,000/ 10,000rpm belt-driven spindle
- 3 Z-axis travel 1020mm
- 4 200/ 300/ 400/ 500mm higher column
- 5 Interface preparation for coolant
through spindle system
- 6 Coolant through spindle system 20/70 bar
(Vertical spindle)
- 7 Coolant through tool holder interface
- 8 Coolant through tool holder
5/20 bar cutting fluid interface
- 9 Oil skimmer
- 10 Oil mist cooling device
- 11 40 tools magazine with arm type ATC
- 12 Enclosed splash guard with roof
- 13 Chip auger on table side
- 14 Chip cart
- 15 Air conditioner for electrical cabinet
- 16 XYZ axis linear scale feedback
- 17 3-axis independent manual pulse generator
- 18 Sub table
- 19 Rotary table
- 20 Interface preparation for rotary table
- 21 Spindle cutting load software protection
- 22 Z-axis retract function at power failure
- 23 Auto tool length measurement
- 24 Auto workpiece measurement
- 25 Transformer
- 26 Auto warm up

Optional accessory for auto head attachment

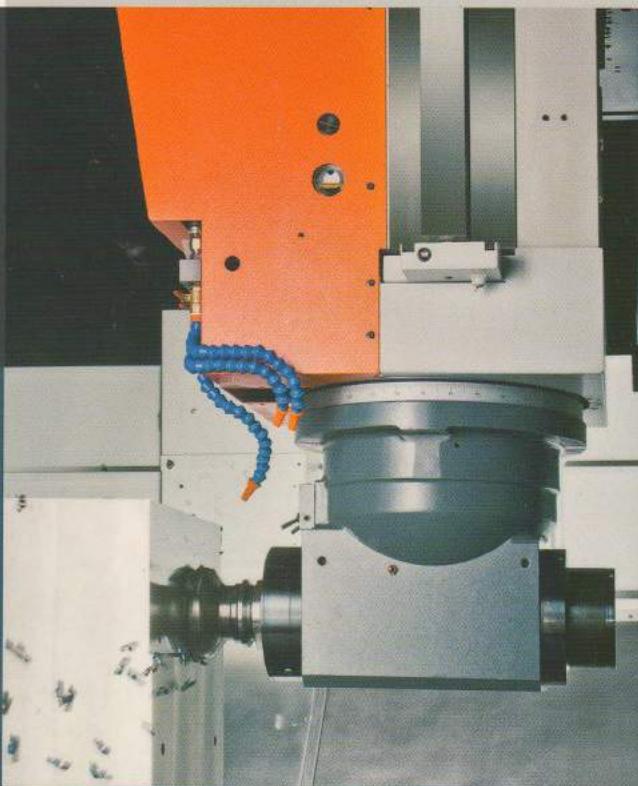

- 1 Auto AC90 degree angular head/
AC extended head
- 2 Auto AC milling head/ small head/
customized head attachment
- 3 Manual 90 degree angular head/
extended head/ universal head
- 4 Manual swiveling arm type head bracket
on operation side(one head attachment)
- 5 Auto swiveling arm type head bracket on
operation side(one head attachment, one cover)
- 6 AC90 degree angular head coolant
through spindle system 20bar
